Design Technology - Sandwiches

Over the term we have been looking at healthy sandwiches. This week, your task is to:

1. **Complete your sandwich packaging**

Make it look appealing. Think about what colours you could use, what slogan or tag line you could write to grab people's attention and how much you will charge for your sandwich - people need to know the cost!

2. **Make your healthy sandwich.**

Watch this video before starting:

<https://www.warburtons.co.uk/corporate/teaching-resources/sandwich-making-project> Remember to wash your hands, wear an apron and use knives safely.

Why not take a photo of your sandwich once you have made it? Or perhaps you could draw a picture of it.

3. **Write an evaluation of your sandwich.**

Answer some or all of the following questions:

- What did you like about the sandwich you made?
- What would you change next time?
- Did your ingredients work together? How did the sandwich taste?
- How healthy was your sandwich? How could you make it even healthier?
- What was the feedback from others who tried it?
- Does your packaging fit with the sandwich you made?

4. **Make a TV advertisement for your sandwich.**

Create a storyboard for your advert (like the ones we did in computing), thinking about the commentary you will need and the shots that you could take. What camera work will you use (panning, close up etc.)? Don't forget to make it sound like the best sandwich someone could ever buy! Film your advert, making use of your commentary.
