# Multiplication T0 x T0

- Calculate  $T0 \times T0$
- Estimate and check the answer to a calculation

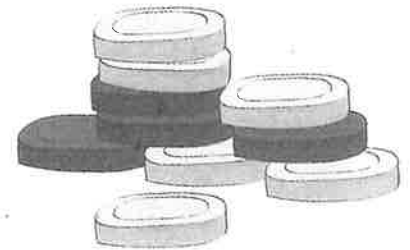

### You will need:

- 9 counters each (different colour per player)
- paper and pencil – for each player

Play this game with a partner.

- Take turns to:
  - choose two cards from above and on your sheet of paper write a multiplication calculation
  - estimate the answer and then choose a possible answer from the number board below
  - work out the answer using a written method.
- If your choice is correct place a counter over the answer.
- The winner is the first player to place three of their counters in a row, column or diagonal.
