Name: _____   Date: _____

Counting in 2s, 5s and 10s

Count on and back in steps of 2, 5 and 10

|					
7	9			15	
20		16			10
1	6		16		
48	43			28	
44	54			84	

What to do

- Ask your child to cut the numbers from the bottom of the sheet and to sort them according to their pattern.
- Ask them to place each set of 3 numbers into the matching row, finding the correct order by counting on or back in 2s, 5s or 10s.

Can your child explain the pattern for each row? For example, look at the first row: 7, 9 … What is the difference between 7 and 9? (2) What comes next? (11) How are you counting? (in steps of 2) Are you counting forwards or backwards? (forwards)

33	11	38	18	74	23	11
14	94	21	13	64	26	12	17
