# Exploring number facts

- Recall addition and subtraction facts to 15

<p>Number track for 15: 15, +0, -6, -4, stars</p>	<p>Number track for 13: 13, -7, -3, +2, stars</p>
<p>Number track for 10: 10, -3, +2, +4, stars</p>	<p>Number track for 12: 12, +3, -7, -4, stars</p>

## What to do

- For each spacecraft, ask your child to follow each path to a planet, work out the addition or subtraction and write the answer on the star. Then do the same for the other two paths. Your child can use the 0-15 number track to help work out the answers by counting on or back.
- Ask your child to use the number track to make up their own additions and subtractions using number facts to 15, and to write and illustrate these on the back of this sheet.
