

Estimating and measuring

Estimate and measure lengths and heights

Date: _____

You will need:

- ruler
- metre rule
- glue stick
- book
- scissors
- small bottle
- chair

Object	Estimate	Measurement

Teacher's notes

Children estimate the length or height of each real object. They then use a 30 centimetre ruler to measure the actual length/height. They write their estimates and measurements in the appropriate spaces in the table. Then children use a metre rule to measure the height of a chair.
