Name: _____ Date: _____

My number storybook

• Solve simple addition and subtraction problems

What to do

• Help your child to cut out the storybook, and fold along the dotted line. Then work with your child to complete each page of their number storybook.

Ask your child to make her own number storybook with one addition or one subtraction problem on each page, using facts to 20. If they find facts to 20 difficult, suggest they write facts to 10 or 15.

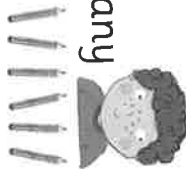

My number storybook by _____

Jacob has 16 flowers. He gives 7 away. How many does he have now?
