Some children go to a café for lunch.

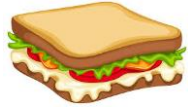

This is the menu they can choose from.

Each child has 20p to spend.

Work out how much each child spends and then how much change they will get.

Frank buys  and  . He spends...

His change is...

Task: Use your knowledge of addition and subtraction to complete the 'yo-yo spending' activity.

Remember: Use a number line for support and always check your calculations by using the inverse!
