

Thermometer problems

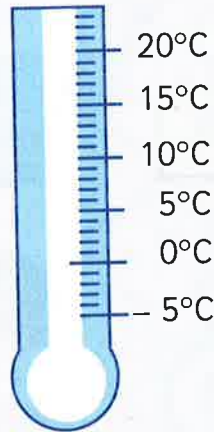

Solve problems involving temperature

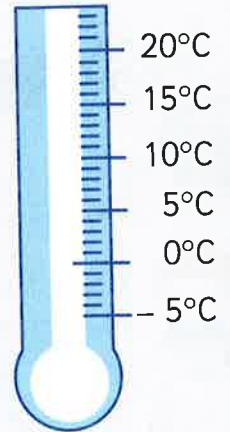

The temperature in Didsbury on a summer day.

Morning: 7°C.

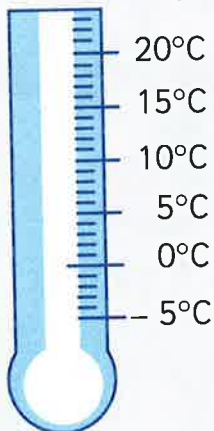

Afternoon: 13°C higher than
the morning °C.

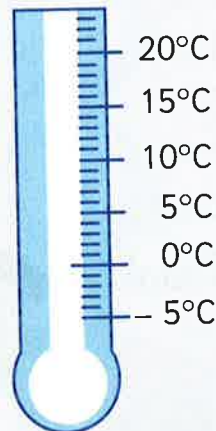

Evening: 5°C lower than
the afternoon °C.

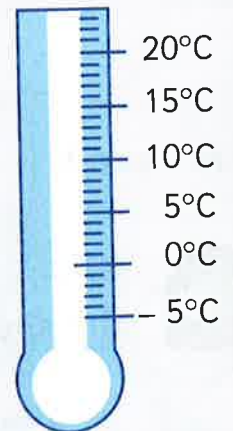

The temperature in Didsbury on a winter day.

Morning: -5°C.

Afternoon: 12°C higher than
the morning °C.

Evening: 9°C lower than
the afternoon °C.

Teacher's notes

For both the days, children shade the given temperatures on the first thermometers. Then they work out and shade the temperatures for the afternoons and evenings, writing their answers in the box, and then shade the second and third thermometers to the correct temperature.
