

## Week 4

Please practise all  $\times$  and  $\div$  facts for 2, 5 and 10 up to  $12 \times 2$  etc.

Remind children that they don't just move the zero when  $\times$  or  $\div 10$ , but rather the number moves one place to the right or left.

eg.

$$70 \div 10 = 7$$

$$8 \times 10 = 80$$
