

Zoo problems

Solve addition and subtraction problems using written methods

The snakes ate 48 mice on Saturday and 44 mice on Sunday. How many mice did they eat altogether at the weekend?

The keeper gives the monkeys 78 bananas. They eat 66 of them. How many bananas are left?

There are 45 penguins in the zoo and 22 of them are swimming. How many are not swimming?

There are 37 green parrots and 45 red parrots. How many parrots are there in total?

Teacher's notes

Encourage children to use written methods to solve the word problems using the space at the bottom of each problem for working out.
