

No children were born in and .

Summer-born children are born in June, July and August.

There are summer-born children in Class 2T.

There are winter-born children in Class 2T.

Complete the frequency table for each month.

Jan.	Féb.	Mar.	Apr.	May	Jun.	Jul.	Aug.	Sep.	Oct.	Nov.	Dec.

Think of your own question which can be answered from the block diagram. Write the question and the answer.

Teacher's notes

The block diagram shows the birth months for children in Class 2T. Each block represents one child. Children use the diagram to complete the sentences. You may need to prompt them to think about which are the "winter" months. The focus is on birth month so that those children who do not celebrate birthdays are included. Children complete the frequency table at the bottom of this page by counting the blocks in each month on the block diagram at the top of page 34 then they think of their own question and write its answer in the space below.
