

After 10 more rolls ...

I have made this total (or totals) most often:

I have made these new totals:

I have not made these totals:

Are your answers the same after 20 throws and after 30 throws?

Make up a question which can be answered from the Block Diagram.

What is the answer to your question?

Teacher's notes

Children roll the two dice and add the numbers together. They then colour in a square for the total, starting from the bottom of a column and repeat 10 times. They then use the block diagram to answer the first set of questions. They roll the dice 10 more times and answer the second set of questions. Some children will find it useful to make a tally mark each time they roll and total the dice to keep track of what they are doing. Children who need more support should use one dice.
