# Ice cream pictogram

Complete a pictogram and use it to answer questions

This table shows the number of ice creams sold by the ice-cream van.

Flavour	Chocolate	Cookie	Mint	Orange	Pistachio	Strawberry	Toffee	Vanilla
Number sold	27	22	17	11	15	19	15	29

The owner would like to stock 6 flavours instead of 8 but isn't sure what his records tell him. Complete the pictogram to help him.  
Use  for 2 ice creams and  for one.

Chocolate																			
Cookie																			
Mint																			
Orange																			
Pistachio																			
Strawberry																			
Toffee																			
Vanilla																			

The owner should make sure he always has plenty of \_\_\_\_\_.

I think the owner should stop selling \_\_\_\_\_.

What is the problem with choosing 6 flavours to sell?

\_\_\_\_\_

If the owner decided to sell only 5 flavours, which flavours should he sell?

\_\_\_\_\_

### Teacher's notes

Children complete the pictogram using the information in the table. They then use the pictogram to answer questions. Children will need to read the questions carefully, as they are perhaps more open than the children are used to. They may find it confusing that two ice-creams sell the same amount and are the next to least popular.
