

# Problems on the move

## Solve word problems

There were 83 passengers on a boat. 38 got off. How many are left on the boat?

A bus has 75 passengers. 56 of them are sitting down. How many are standing?

95 cyclists start a race. 17 of them are too tired to finish. How many finish the race?

There are 73 bus drivers. 26 are men. How many are women?

### Teacher's notes

Children choose their own preferred method for solving each of the problems using the space at the bottom of each problem for working out.
