Science - Parts of a Plant

To identify different parts of a plant and explain their function.

1) If you have the opportunity, go out into your garden and try to identify as many flowering plants as you can. How many can you name?

2) Select a plant you have found, and try to identify the roots, its leaves, the stem and flowers.

3) Create an explanation text or a fact file. Draw pictures of your flowering plant and label each part. Explain the function of each part and try to draw your chosen plant.

You might find some useful information by watching these clips:

Extra Challenge:

Try to identify the parts of the flower too. You may wish to research the parts of a flowering plant to understand the function of each part. Present your findings as you wish.
