

# Longship addition

Use doubles to help solve addition problems

$7 + 8 =$

$6 + 6$

$4 + 5 =$

$8 + 8$

$6 + 7 =$

$7 + 7$

$5 + 6 =$

$4 + 4$

$8 + 9 =$

$5 + 5$

**Teacher's notes**

Children solve the addition calculation on each Viking longship, using an addition double to help them. They then continue the line from each ship to show the route to the addition double island that helped to solve the problem.
