Division using partitioning

Use partitioning to calculate $TO \div \square$

You will need:

- coloured pencils

1 Find and colour the multiples of 3, 2 and 4.

2 Partition each of these numbers to help you find the answer to the division calculation.

Example

$$\begin{aligned} 69 \div 3 &= (60 + 9) \div 3 \\ &= 20 + 3 \\ &= 23 \end{aligned}$$

a $84 \div 3 =$

$=$

$=$

b $84 \div 4 =$

$=$

$=$

d $48 \div 4 =$

$=$

$=$

f $66 \div 3 =$

$=$

$=$

c $93 \div 3 =$

$=$

$=$

e $64 \div 2 =$

$=$

$=$

g $88 \div 4 =$

$=$
