

Challenge

The Norman Conquest and the Battle of Hastings both took place in 1066.

Investigate different addition calculations of 2-digit and 3-digit numbers that have the answer 1066.

Think about ...

What's the easiest calculation you can make using 2-digit and 3-digit numbers? What's the hardest calculation?

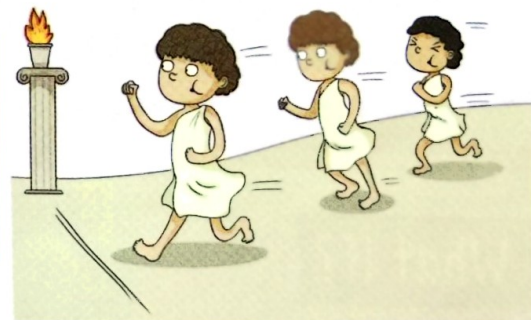

Think about working backwards.

What if?

Investigate different subtraction calculations of 2-digit and 3-digit numbers that have the answer 776.

The first Olympiad was held in 776 BC.
