

Find the digits

- Complete these number sentences by putting a digit in each empty box.

Example:

$$\square \square - 15 = 3.$$

Put 1 and 8 in the empty boxes
so $18 - 15 = 3$.

$$35 - \square \square = 7$$

$$2 \square - 8 = \square 2$$

$$\square 5 - 6 = \square$$

There are two possible answers to the next number sentence.

$$3 \square - \square 6 = \square 1 \text{ and } 3 \square - \square 6 = \square 1$$

$$\square \square 8 - \square \square = 9$$

How many solutions can you find for this number sentence?

$$1 \square - \square = 14$$

Can this number sentence be solved? Explain your answer.

$$\square \square \square - \square = \square 0$$
