Use this fact:
$63 \div 9=7$
Now work out the following using the above fact:
$126 \div 9=14$
$126 \div 14=9$
$189 \div 9=21$
$189 \div 21=9$
How does it help you?
Explain using mathematical understanding.
$1320 \div 12=110$
Using the above fact work out:
$264 \div 12=22$
$660 \div 11=60$
How does this fact help you?
Explain using mathematical vocabulary.
