

Fraction climb

- Use the clues to move from row 1 up to row 6.

$\frac{1}{6}$	$\frac{1}{3}$	$\frac{1}{2}$	$\frac{1}{4}$	$\frac{1}{12}$	row 6
$\frac{1}{12}$	$\frac{1}{4}$	$\frac{1}{10}$	$\frac{1}{3}$	$\frac{1}{5}$	row 5
$\frac{1}{4}$	$\frac{1}{12}$	$\frac{1}{20}$	$\frac{1}{5}$	$\frac{1}{3}$	row 4
$\frac{1}{6}$	$\frac{1}{3}$	$\frac{1}{8}$	$\frac{1}{10}$	$\frac{1}{2}$	row 3
$\frac{1}{3}$	$\frac{1}{5}$	$\frac{1}{8}$	$\frac{1}{20}$	$\frac{1}{4}$	row 2
$\frac{1}{8}$	$\frac{1}{5}$	$\frac{1}{4}$	$\frac{1}{10}$	$\frac{1}{3}$	row 1

Read the clue to identify one fraction in row 1. Draw a circle round the fraction. Then move to row 2. When you have found the fraction in this row join the two circles by a straight line. Continue moving upwards to row 6.

These are the clues:

Row 1. I am the middle in size of the fractions in my row.

Row 2. I am twice as big as another fraction in my row.

Row 3. I am a quarter of the size of another fraction in my row.

Row 4. I am 5 times larger than another fraction in my row.

Row 5. I am equal to the sum of two other fractions in my row.

Row 6. I am equal to the sum of three other fractions in my row.
