Finding fractions

Find fractions of amounts

You will need:

• 12 counters

Take 12 counters.

Use the boxes below to see if they can be divided into these fractions.

Put a ✓ or X next to the fractions.

Fraction	√ or X
Halves	
Thirds	
Quarters	
Sixths	

Remember fractions are always equal so you must have the same amount in each box.

 Halves ¹/₂ 		

- Thirds $\frac{1}{3}$
- Quarters $\frac{1}{4}$
- Sixths $\frac{1}{6}$
