

Pizza problem

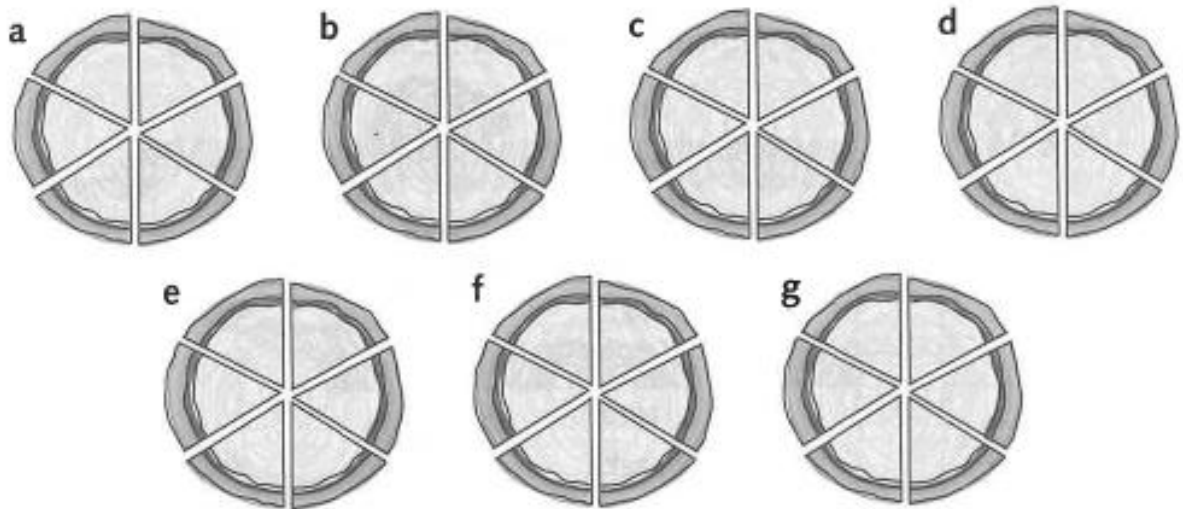

Compare and order unit fractions, and fractions with the same denominator

1 Choose three different toppings.

Using pizzas that are divided into sixths, how many pizzas can you create?

You can only use one topping per slice.

2 Write a fraction addition calculation for each pizza.

Example

$$\frac{1}{6} + \frac{2}{6} + \frac{3}{6}$$

b $\frac{\square}{\square} + \frac{\square}{\square} + \frac{\square}{\square}$

c $\frac{\square}{\square} + \frac{\square}{\square} + \frac{\square}{\square}$

a $\frac{\square}{\square} + \frac{\square}{\square} + \frac{\square}{\square}$

d $\frac{\square}{\square} + \frac{\square}{\square} + \frac{\square}{\square}$

e $\frac{\square}{\square} + \frac{\square}{\square} + \frac{\square}{\square}$

f $\frac{\square}{\square} + \frac{\square}{\square} + \frac{\square}{\square}$

g $\frac{\square}{\square} + \frac{\square}{\square} + \frac{\square}{\square}$
