

## Column subtraction (3)

- Subtract 3-digit numbers using the formal written method of column subtraction
- Estimate and check the answer to the calculation

Write different subtraction calculations for each question.

- Choose a number from the first box for the top row.
- Choose a number from the second box for the bottom row.
- First estimate the answers to your calculations. Then work them out using the formal written method.

Challenge

Write six calculations for each question.

1  $367, 396, 378, 389$  –  $235, 124, 264, 151$

2 In these calculations you will need to change the 1s column.

$384, 375, 363, 392$  –  $216, 247, 258, 236$

Challenge

2 Write six calculations for each question.

1 In these calculations you will need to change the 1s column.

$463, 472, 581, 594$  –  $247, 329, 358, 236$

2 In these calculations you will need to change the 10s column.

$418, 427, 546, 535$  –  $362, 274, 391, 183$

Challenge

3 Make up 12 calculations. You may have to change the 1s or the 10s or both.

$628, 749, 682, 817, 926, 783, 891, 983$  –  $473, 382, 518, 539, 327, 282, 493, 328$
