

Challenge

Use pairs of numbers from the screen. Add the numbers or find the difference between them to make the numbers on these cards:

615	306	547
245	177	691
382	752	238

Did you use all the numbers on the screen? If not, which numbers did you not use?

Think about ...

Making estimations will help you identify possible pairs of numbers on the screen that, when added or subtracted, will be one of the numbers on the cards.

Look for similarities between the numbers on the cards and the numbers on the screen.

What if?

What other numbers can you make by adding or subtracting pairs of numbers on the screen?

When you've finished, turn to page 80.
