

Construct

Each pair of degrees below are two of the angles in a triangle.

Work out the size of the missing angle (x) in each of these triangles and use a protractor to draw the triangles. Be sure to label the size of each of the angles.

60° , 80° and x°

90° , 40° and x°

30° , 80° and x°

40° , 40° and x°
