

LIFE CYCLES OF AMPHIBIANS

Your task this week is to research the lifecycle of amphibians.

Use the clue sheet to find evidence of some amphibians living in your garden. Once you've found some, choose one to create an illustrated diagram of. You can use natural examples of their habitat to demonstrate where they might live and make it as arty as possible!

Present it in one large information page, be sure to include facts about what they eat/drink and where they live, as well as anything else you can find!
